No problem. We appreciate you doing this.

Joan,

Making good progress on these, will definitely finish and get the fields to you today. Just taking longer than I expected.

Milo

Sounds good. I'm working from home, but we don't need the map until Friday. Thanks for all your help.

Joan,

My meeting in Chris' conference room went late ... but still made lots of progress on the CSD fields layer afterwards. I should wrap it up tomorrow morning.

Hi Milo.

Did you complete this layer yet? I have some mapping of the fields and the sampling houses to create this week.

Thanks.

Importance: High

Cheryl,

Disregard my email. **Ex. 6 Personal Privacy (PP)** Don't worry about my email below, I talked to Joan and I will create the GIS layer of CSD's application fields including field id's.

Milo

Subject: RE: Fields applied on in the fall for 2017 or SWQMA Areas

Hi Cheryl,

Believe or not I never had in my possession a GIS layer of CSD fields that were attributed with the unique field id identifier. Nor am I aware that such a GIS layer is in existence.

You probably concluded that I must have such a layer due to the 1st attached map that I created that shows application fields outlined in red. I digitized that application fields layer using a combination of CSD's NMP and land parcel ownership data from the counties, but I didn't have any reference field id's to populate the attribute table.

The good news is that if really needed, I can create an application fields GIS layer that includes these unique field id's using the 2nd attachment I found posted in the WECAB directory on the g: drive. It looks like all of the field id's on the list you sent me are accounted for except for the first two fields on your list, Basse North and HC-1. If you could send me additional information or a map showing these fields, in the meantime I can get started on digitizing a GIS layer using the 2nd attachment as reference information for those application fields highlighted and their field id's.

Do you like this plan? Or do you think perhaps someone has already created such a GIS layer of CSD application fields that includes the field id's?

Subject: Fields applied on in the fall for 2017 or SWQMA Areas

Hi Milo

Attached is a file that contains the proposed fields to applied on in 2017 fall or in the SWQMA areas for Central Sands Dairy, LLC could you provide me a map of where these fields are located.

Thank you.

Sincerely,

Cheryl Burdett
